STAMP OUT LAMENESS

FOLLOW THE 5 POINT PLAN

Reduce lameness down to 2% in 3 years¹

Lameness, particularly footrot, is one of the most important health and welfare issues facing UK sheep farmers. Poorly controlled, lameness causes visible pain and reduces performance – resulting in increased labour and treatment costs as well as premature culling. By following this well researched and proven lameness reduction plan, you can reduce lameness down to 2% in just three years.¹

Help stamp out lameness from your business and make the commitment today. To find out more about the Lameness Reduction 5 Point Plan, contact your animal health advisor, scan the QR code or visit www.fwi.co.uk/livestock/lameness

Footvax™
For Footrot

Reference 1: FAI trial data 2009-2012.
Use medicines responsibly. For more information visit www.noah.co.uk/responsible
Footvax is only available via your animal prescriber or veterinary surgeon from whom advice should be sought. Footvax contains ten strains of inactivated *Dichelobacter nodosus* with an oil adjuvant.
